

The DaVinci  
of Yesterday

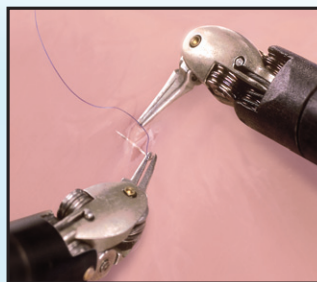

Donna Pinelli, M.D., Board Certified,  
Gynecology/Oncology, da Vinci  
Surgical Robotics Team Leader

# The da Vinci® Of Today

## THE FUTURE OF ROBOTIC SURGERY IS HERE AT JUPITER MEDICAL CENTER

This fall, Jupiter Medical Center surgeons are gaining an extra set of hands. The da Vinci® Surgical System will offer thoracic, urologic, colorectal and gynecologic patients unparalleled precision, control and dexterity combined with high definition 3-D anatomical visualization. The da Vinci's robotic hands can perform surgical tasks beyond the capabilities of human hands, exceeding the natural range of motion.

The da Vinci Surgical System provides surgeons all the characteristics of open surgery, with all the benefits of minimally invasive surgery. Patients will experience smaller incisions, less pain and a faster recovery.

The Robotic Surgery Program is funded primarily from philanthropy. To learn how you can help support the Jupiter Medical Center Foundation and be a part of the Medical Center's growth, please call (561) 263-5728.

CALL (561) 745-5737 TODAY FOR MORE INFORMATION  
OR FOR A PHYSICIAN SPECIALIZING IN THIS NEW TECHNOLOGY.
